[LinkedIn](#) | [GitHub](#)

Professional Summary

Results-driven Full-Stack Developer and Computer Science graduate with hands-on experience building web applications, Android applications, backend services, and system-oriented software. Experienced with React, JavaScript, Firebase, Node.js, REST APIs, Kotlin, Jetpack Compose, MongoDB, and modern development workflows. Built multi-role platforms, real-time applications, Android system interfaces, backend session-management systems, and hardware-control prototypes. Strong interest in cloud computing, distributed systems, runtime orchestration, AI-powered software, and backend architecture. Comfortable taking projects from UI/UX design and architecture through implementation, integration, testing, and deployment.

Technical Skills

Languages	JavaScript (ES6+), TypeScript, Kotlin, C#, Python, HTML5, CSS3
Frontend	React, Vite, Tailwind CSS, Bootstrap, GSAP, Responsive Design, Component-Based Architecture
Android	Kotlin, Jetpack Compose, Material Design 3, Android SDK, Android API 26+, REST API Integration
Backend	Node.js, Express.js, ASP.NET Core, REST APIs, JWT Authentication, Middleware, Nodemailer
Databases	MongoDB, Mongoose, Firebase Firestore, Firebase Authentication, SQL Server, PostgreSQL
Cloud / Infrastructure	Firebase Hosting, Netlify, Railway, Render, Docker, Redis, Environment Configuration
Tools	Git, GitHub, VS Code, Figma, Google Stitch, Power BI, Microsoft Excel, Postman
Engineering	System Design, HLD, LLD, Authentication, Role-Based Access Control, API Integration, Real-Time Systems, Agile, Scrum, Problem Solving

Work Experience

Aakyas Agency March 2026 – Present

Full Stack Developer Intern

- Designed and developed full-stack web applications using React, JavaScript, Firebase, and REST APIs within agile development cycles.
- Built reusable, responsive UI components and collaborated with design and product teams to translate requirements into functional interfaces.
- Integrated third-party REST APIs and implemented real-time application data flows using Firebase Firestore.
- Implemented Firebase Authentication, protected routes, and role-based access control for multi-user applications.
- Participated in code reviews, sprint planning, debugging, and daily stand-ups while continuously improving code quality and development workflow.

Kent RING 2023 – 2025

Customer Service Representative

- Managed and resolved a high volume of customer technical issues through structured troubleshooting and problem-solving.
- Documented customer requirements, recurring technical problems, and feedback to support product improvement discussions.
- Collaborated with cross-functional teams in a fast-paced environment while maintaining strong communication and adaptability.

Trinet January 2022 – December 2022

Customer Service Representative

- Delivered customer support and technical troubleshooting assistance across multiple product lines.
- Developed strong interpersonal, problem-solving, communication, and time-management skills in a client-facing environment.

Featured Projects

Cloud OS – Android Cloud Computing Client 2026 – Present

Kotlin, Jetpack Compose, Material Design 3, Node.js, REST APIs, JWT, Redis, Docker

- Designed and developed an Android client for a cloud-oriented operating environment, focusing on remote runtime management and interaction between the Android interface and backend infrastructure.
- Implemented a backend session lifecycle and state machine managing runtime states including CREATING, STARTING, RUNNING, STOPPING, and TERMINATED.
- Built the Android interface using Kotlin, Jetpack Compose, and Material Design 3 with a focus on responsive system-style UI and runtime status representation.
- Integrated backend session orchestration with the Android client so users can interact with and monitor remote runtime environments from a mobile interface.
- Worked on authentication, session security, runtime communication, and infrastructure configuration using JWT, Redis, Docker, and environment-based configuration.

- Structured the project around modular frontend, backend, runtime-control, and session-orchestration responsibilities to support future expansion into a broader cloud OS platform.

AirPods Clone Control – Bluetooth Device Control Application

2025 – 2026

Android, Kotlin, Jetpack Compose, Bluetooth, Material Design

- Built a Bluetooth-focused Android application inspired by wireless-earbud control interfaces.
- Designed a modern device-control interface for displaying device information and interacting with connected wireless hardware.
- Explored Android Bluetooth APIs, device communication, connection states, and hardware-oriented application workflows.
- Applied Jetpack Compose and Material Design principles to create a clean, responsive, component-based mobile interface.

OneKconnect – Job Board & Internship Management Platform

2025 – 2026

React, Node.js, Express.js, MongoDB, JWT, REST APIs

- Designed and developed a multi-role full-stack platform for managing jobs, internships, applicants, and organizational workflows.
- Implemented separate Admin, Manager, Supervisor, and Intern experiences with role-specific dashboards and permissions.
- Built authentication and authorization using JWT-based security and protected routes to prevent unauthorized access.
- Developed REST APIs using Node.js and Express.js with MongoDB and Mongoose for persistent application data.
- Designed workflows for internship management, user administration, task coordination, and role-specific operations.
- Built responsive React interfaces using reusable components and modern frontend development practices.

Readlog – Full Stack Book Reading Tracker

2025

React, Vite, Firebase, Firestore, Recharts

- Built a full-stack reading tracker allowing users to record books, track reading progress, and visualize reading habits through interactive charts.
- Implemented Firebase Authentication and Firestore for secure per-user real-time data persistence.
- Designed a responsive dashboard with data visualization using Recharts.

Notes App – Full Stack CRUD Application

2025

React, Firebase, Firestore

- Developed a complete notes management application supporting Create, Read, Update, and Delete operations.
- Implemented Firebase Authentication and per-user data isolation.
- Used real-time Firestore listeners for instant synchronization between the application and stored data.
- Deployed the application using Firebase Hosting.

Personal Portfolio Website

2024 – 2025

React, Bootstrap, GSAP

- Designed and developed a responsive developer portfolio using React and Bootstrap.
- Implemented 16 GSAP animation systems including scroll-triggered reveals, parallax effects, and staggered transitions.
- Optimized the interface for desktop, tablet, and mobile experiences.

Weather Forecasting Web App – Final Year Project

2024

HTML, CSS, JavaScript, REST API

- Built a real-time weather application consuming a public REST API to display current weather conditions and forecasts.
- Focused on intuitive UI/UX design, responsive layouts, and cross-device compatibility.

Education

Sir Syed University of Engineering & Technology

2021 – 2025

Bachelor of Computer Science (BCS)

Karachi, Pakistan

F.G. College Karachi

2020 – 2021

Pre-Engineering (FSc / Intermediate)

Karachi, Pakistan

F.G. Public School Cantt

2018 – 2019

Matriculation – Computer Science

Karachi, Pakistan

Certifications & Professional Courses

Governor Sindh IT Initiative – 1-Year Programme

- Specialization covering Meta AI, Generative AI, Web3 development, blockchain fundamentals, and modern full-stack web technologies.

NAVTEC / NAVTEC – Application Development Programme

- Three-month hands-on programme covering software and application development fundamentals, programming concepts, project workflows, and industry practices.

Professional Development

.NET Full-Stack Development

- Studying C# and ASP.NET Core fundamentals including object-oriented programming, MVC architecture, middleware, and backend application structure.
- Developing REST APIs with ASP.NET Core and studying HTTP methods, endpoints, controllers, services, and backend architecture.

- Practising SQL Server database design, relational schemas, queries, and integration with .NET backend applications.
- Working toward full-stack applications combining ASP.NET Core APIs with React frontends.
